DETAILED ACTION

This restriction requirement is in response to the amendment filed January 10, 2005 by which claims 2, 3, and 11-20 were canceled and (at least) claims 1 and 21 were amended. *Thus*, the amendment to the claims necessitated this restriction requirement.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 4-10, drawn to a substrate carrier, classified in class 211, subclass 041.18.
- II. Claims 21-30, drawn to a method for protecting semiconductor substrates in a substrate carrier, classified in class 414, subclass 941.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). *In the instant case*, the process for using the product as claimed can be practiced with another materially different product such as a product without the curbing member and sloped profile "disposed on an upper side of each channel", as in claim 1 (see lines 10-11). *Also*, the product as claimed can be used in a materially different process of using that product such as not having a bottom end having a flat bottom, as in claim 21 (see line 15).

Art Unit: 3634

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
